

BELMONT QUOLIS

The Belmont Quolis is designed as a Dental Treatment Centre that meets the needs of the entire professional team. Combining Technology, style and functionality, the Quolis bridges the gap between what has been available and what your team wants.

- Change from Left to Right operation with ease.
- Double articulated headrest allowing for easily positioning the patients head for excellent access to upper and lower arches.
- Seat and backrest repositioning are controlled by built in touch pads that can be controlled from the operational table or from either side of the chair's built-in armrest touch pads.
- A separate floorbox allows for flexibility.
- Flexible treatment centre with or without spittoon.
